(470) 429-4524 | shelden.rattray1@gmail.com | linkedin.com/in/shelden-rattray | github.com/sheldenr | sheldenr.dev

EDUCATION

Georgia State University (Honors College) *Computer Science, B.S.*

Expected May 2027

Awards & Activities: \$2500 Delta Analytics Scholarship Recipient, 5x President's List Recipient

GPA: 4.00/4.00

Relevant Coursework: Data Structures, Analysis of Algorithms, Discrete Mathematics, System-level Programming, Linear Algebra, Applied Probability & Statistics, Cloud Development,

TECHNICAL SKILLS

Cloud, Data & Tools: AWS, Azure, GCP, Docker, CI/CD, MySQL, Redis, Firebase Realtime DB, TensorFlow, PyTorch

Programming & Development: Java, Python, JavaScript, TypeScript, C, C#, Dart, SQL, React.js, R, Node.js, Flutter, Spring Boot

EXPERIENCE

Cloud Platform Engineering Intern | Fiserv

May 2026 – Present

- Developed internal platform tools, automation scripts, and containerized environments using Docker to streamline cloud deployment for application teams.
- Designed and maintained CI/CD pipelines using AWS deployment services, automating software delivery workflows from source control to public cloud production environments.
- Program programmatic infrastructure using Terraform, managing cloud environments through standard software development lifecycles.
- Build observability solutions and apply SRE principles to application architectures, writing custom configurations to track system health and improve scalability.

Software Engineering Intern | CuesHub

Jul 2025 – Aug 2025

- Built 10+ user interfaces in for a production mobile application that visualized heart rate and accelerometer to the user in real-time.
- Successfully implemented in-app logging utilities and structured exception handling to improve issue traceability and application stability.
- Optimized state management and caching mechanisms, effectively improving UI performance and improving frame rendering consistency.

PROJECTS

Polysia | Full-Stack Web Application | *React, Firebase, PostgreSQL, RAG* – [Website](#) – [GitHub](#)

- Built and deployed a full-stack web application that tracks, creates and reads stories in Mandarin Chinese to assist language learners.
- Implemented a simple model that takes user character retention data via a simple SRS-based learning system and maps the data into a custom Adaptive Learning Model, accurately determining each user's learning rate.
- Integrated LLM-based conversational feedback pipelines powered by DeepSeek and Azure Neural TTS.

Timeout Optimization Model | Python, XGBoost, React | *Hacklytics 2026* – [GitHub](#)

- Developed a hybrid ensemble AI platform to quantify NBA momentum shifts and predict timeout effectiveness, utilizing 6 seasons of play-by-play data via the NBA API.
- Implemented a weighted ensemble algorithm to synthesize model outputs, identifying that timeouts are statistically most effective during 7-9 point runs rather than later 12-0 runs.
- Utilized Pandas and NumPy for large-scale data manipulation and normalization, optimizing model training for use in high-stakes, fast-paced game environments.

Rhythm Game Performance Calculator | Browser Extension | *JavaScript* – [GitHub](#)

- Developed a browser extension with 4,000+ installs, featuring a custom API integration layer for fetching, normalizing, and processing game data at scale.
- Optimized asynchronous workflows and caching to reduce load times and ensure reliable data accuracy.
- Packaged cross-browser builds using the WebExtension API with automated CI for deployment.

LEADERSHIP & OTHER EXPERIENCE

Hackathon | 1st Place | Truist & Deloitte CTF Hackathon

- Captured 10/10 flags across categories such as Crypto, Forensics, Pwn and Reversing, with a focus on real-world cybersecurity challenges on the HTB's CTF platform.

STARS Ignite | Marketing Director

- Served as the sole Marketing Director for Star Computing Core's largest University Chapter: STARS Ignite @ GSU. Established numerous organization connection points, facilitated marketing for events such as HBSxMIT National Security Conference 2026 and many more events.
